EDUCATION

SWAMI KESHVANAND INSTITUTE OF TECHNOLOGY MANAGEMENT AND GRAMOTHAN Bachelors Of Technology in Computer Science (Honours) specializing AI with CGPA -9.76	Jaipur, Rajasthan 2021-2025
MAHESHWARI GIRLS PUBLIC SCHOOL Senior Secondary Education (CBSE) with 82.4%	Jaipur, Rajasthan 2021
MAHESHWARI GIRLS PUBLIC SCHOOL Secondary Education (CBSE) with 92.5%	Jaipur, Rajasthan 2019

WORK EXPERIENCE

Associate Data Consultant, Data Engineer **December 2024 – Present**
Hakkoda | India

- Delivered analytics solutions as a data consultant using Snowflake, SQL, and Python to build reliable data models and support reporting and decision-making needs.
- Developed Streamlit applications and dbt models, including an end-to-end dbt capstone project, to enable scalable transformations and analytics-ready datasets.
- Designed dashboards by leveraging curated Snowflake data and modern BI practices using Sigma, enabling self-service insights and improved data consumption.

PROJECTS

Streamlit Extraction Framework

- Built a **Snowflake Streamlit-based self-service extraction platform** enabling ad hoc and scheduled dataset generation across multiple source systems.
- Designed logic to **combine datasets, apply configurable transformations, filters, and business rules**, and produce standardized output formats.
- Developed scalable backend processing using **advanced SQL and Snowflake-native objects** to support dynamic extract configuration and validated through **pytest-based unit testing**.
- Automated extraction workflows using **AWS MWAA (Airflow)**, integrating Snowflake, S3, Glue, and Lambda for end-to-end processing.
- Provisioned and deployed **Glue jobs and Lambda functions using AWS CDK**, ensuring consistent infrastructure across environments.
- Implemented **Lambda-based email notification services** to monitor extract execution and communicate run status to users.

Data Ingestion & CDC Framework

- Built a scalable data ingestion and replication framework to extract data from enterprise sources like (**Oracle, Microsoft SQL Server**) into Snowflake using **HVR** for real-time and batch data synchronization.
- Configured supplemental logging and **change data capture (CDC)** in source systems to enable efficient and reliable incremental data replication.
- Designed and implemented a **Medallion Architecture** (Raw, Clean, and Curated layers) in Snowflake, ensuring structured data flow and improved data quality across layers.
- Developed raw layer ingestion pipelines and created optimized views to perform **deduplication, transformations**, and business rule application for downstream consumption.
- Automated deployment and release processes using **Octopus Deploy and TeamCity**, ensuring consistent and reliable delivery across environments.
- Leveraged **Snowflake Cortex AI (CoCo) capabilities** and AI functions and developed **Data Glossary/Data**

Dictionary artifacts to enhance metadata management, support data governance initiatives, and improve business user understanding and discoverability of enterprise data assets.

ADDITIONAL INFORMATION

- **Technical Skills:**
 - ❖ **Languages & Querying:** Python, SQL, C, C++
 - ❖ **Cloud & Orchestration:** AWS (Glue, Lambda, SES), Apache Airflow
 - ❖ **Data Platforms & Analytics:** Snowflake, Databricks, DBT, Data Vault, Streamlit, Sigma
 - ❖ **Databases:** Oracle Database, Microsoft SQL Server, MySQL
 - ❖ **Data Integration & DevOps:** HVR, TeamCity, Octopus Deploy, GitLab

- **Certifications & Achievements :**
 - ❖ Snowflake SnowPro Advanced: Data Engineer Certification
 - ❖ Databricks Certified Data Engineer Professional
 - ❖ Snowflake SnowPro Specialty: Gen AI Certification
 - ❖ Databricks Certified Data Engineer Associate
 - ❖ Snowflake SnowPro Core Certification
 - ❖ Secured **4th Rank in Rajasthan Technical University (RTU), Kota** and **Branch Topper (CSE-AI) at SKIT Jaipur**
